ABOUT ME

Motivated Front-End Developer Intern with a passion for creating responsive and user-friendly web applications. Proficient in HTML, CSS, Bootstrap and Tailwind CSS with a strong understanding of web design principles. Eager to learn and grow in a fast-paced development environment. Demonstrates problem-solving skills and attention to detail in every project. A collaborative team player with a focus on delivering high-quality code. Excited to contribute and gain hands-on experience in front-end development.

EDUCATION

JYOTHI ENGINEERING COLLEGES, THRISSUR

2020-2024

Completed Graduation in Bachelors of Technology
Electronics and Communication

SKILLS

- HTML 5
- BOOTSTRAP 5
- GITHUB
- TEAM PLAYER
- CSS 3
- TAILWIND CSS
- FIGMA
- COMMUNICATION

INTERNSHIP

MEARN STACK - LUMINAR TECHNOLAB

2024-NOW

- Frontend Technologies: Utilized HTML, CSS, and Bootstrap to design clean, user-friendly, and responsive web pages. Worked closely with the UI/UX team to ensure consistency across different devices and screen sizes.
- Version Control: Used Git and GitHub for version control, collaborating on code with the team, managing pull requests, and ensuring clean code integration.
- Problem Solving and Debugging: Applied problem-solving skills to debug issues, improve website functionality, and enhance performance. Worked with development tools like Chrome Developer Tools to troubleshoot and optimize the user experience.
- Collaboration & Learning: Actively participated in team meetings and code reviews, gaining knowledge from senior developers. Constantly learning new technologies and techniques to improve coding skills and contribute effectively to projects.

PROJECTS

FOOD DELIVERY WEB SITE

- The Food Delivery Website is a responsive, user-friendly platform designed to allow customers to browse and order food from various restaurants. The project was built using HTML, CSS, and Bootstrap to ensure a clean, modern, and responsive design that works well across devices. The website enables users to view a variety of food items, add them to their cart, and proceed to checkout.
- Technologies Used: HTML, CSS, Bootstrap, GitHub, Vercel

EDUCATIONAL PLATFORM

- The Educational Platform Website is a responsive web platform designed to provide an online learning environment. The website allows students to browse through various courses, read detailed course descriptions, and register for the courses they are interested in. Built using HTML, CSS, and Bootstrap, the platform features a user-friendly and visually appealing design that adapts seamlessly to all screen sizes.
- Technologies Used: HTML, CSS, Bootstrap, GitHub, Vercel
Link : <https://educational-platform-orcin.vercel.app/>

EVENT MANAGMENT

- The Event Management Website for Musical Events is a dynamic web platform designed to manage, promote, and showcase musical events. This website serves as a one-stop solution for event organizers, musicians, and attendees. Users can browse through various music events, learn about the artists performing, view event details such as date, location, and tickets, and even register for events. The website is built using HTML, CSS, and Tailwind CSS, providing a clean, modern, and responsive design.
 - Technologies Used: HTML, CSS, Tailwind CSS, GitHub, Vercel
